The Paradigm Shift

Codebasics INC

The Paradigm Shift

machine learning engineer
SproutsAI · Internship
Oct 2024 - Feb 2025 · 5 mos
California, United States · Remote

building end-to-end autonomous ai agent platform for hiring automation, data enrichment and document processing.

Natural Language Processing (NLP), Large Language Model Operations (LLMOps) and +10 skills

research intern
IITB Trust Lab · Internship
Jun 2024 - Aug 2024 · 3 mos
Mumbai, Maharashtra, India · On-site
helped me get this job

collaborated on project 'domain knowledge based q/a for llms', optimizing and fine-tuning llms for open-ended medical question answering.

Natural Language Processing (NLP), DSPy and +2 skills

Education

Madan Mohan Malaviya University of Technology
Bachelor of Technology - BTech, Information Technology (Finished the Coursework)
Dec 2021 - May 2025

cgpa: 8.47

Experience

Research Intern (Backend | Applied AI - Mantis)
Massachusetts Institute of Technology · Internship
Sep 2025 - Present · 5 mos
Remote

Working on verticals : Post training , Agents , Knowledge Extraction , Data and Backend engineering.

AI engineering intern
Narrative · Full-time
Jun 2025 - Oct 2025 · 5 mos
Remote

R&D of Agentic AI systems in production for Quality Assurance automation
• Developed ETL pipelines for QA automation and Knowledge Graph creation from user activity, achie ...see more

Engineering (Co-founding)
metronis
Jul 2025 - Sep 2025 · 3 mos
Remote

Evals for everything AI
Built a product end to end with my co founder for Automated Evals - ... ...see more

Applied AI research Intern
Tinkering Hub, Parul University · Full-time
Dec 2024 - May 2025 · 6 mos
Vadodara · On-site

Worked on agents in production in early 2024 before the agentic boom.
Worked on Deep Learning frameworks and implementing agentic pipelines for Deep web search/ larg ...see more

Deep Learning, Machine Learning and +2 skills

Education

Parul University
Bachelor of Technology - BTech, Computer Science engineering (AI specialization)
2022 - 2026

Codebasics INC

The Paradigm Shift

We are hiring for 2 Machine Learning Engineers in Bangalore office.

You'll work with me on super impactful projects.

How to apply?
Drop your best work in the comments and I will personally reach out to you if you are a fit.

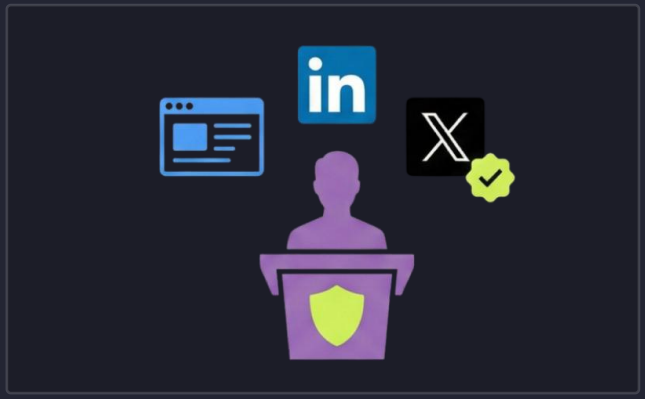
Please Don't DM!

The Metamorphosis Stage

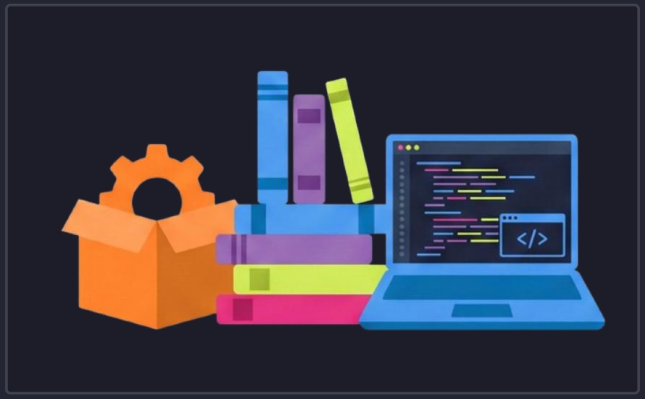
Important
Get out of your comfort zone!

Contribute to Open-Source Software

Learn the art of building online credibility



Build real-world products & libraries



BuildBasics

Build In Public Mentorship 🚀

Codebasics INC

{Section 02}

Activities in this mentorship.

#phase 1

Focus :

Familiarity with OSS, code reading, and starting to "Learn in Public"

Eligibility :

Available since the beginning of the bootcamp

#phase 2

Focus :

Contribute to Codebasics repos and scale personal side projects.

Eligibility :

Must reach Deep Learning (DL) Module AND have 2 side projects or 30 days of learning in public.

#phase 3

Focus :

External OSS contributions, implement research papers, and publish work.

Eligibility :

Merged 3 PRs in a CB repo, OR a side project with 30+ stars, OR 5 published blogs

Internal OSS Contribution

Contribute to Codebasics' OSS projects:

- *nanoagents*: a nano opensource agentic framework
- *nanograph*: a nano graph-based orchestration framework like langgraph
- *nanoevals*: a nano library for evaluating agents and genai solutions

Contribute to popular OSS projects

Get mentorship on how to contribute to OSS projects and build your GitHub credibility.

Fellowship Projects

- Propose a project via the fellowship form. (to be shared in #phase 2)
- Get mentorship on what projects to build, how to architect, design and scale it like a real product.

Paper Reading + Implementation

- Jamming sessions dedicated to decoding the latest research papers and guided implementations.

Independent Research

- Collaborate with the Codebasics Research team in their research initiatives.
- Get mentorship on your independent research initiatives

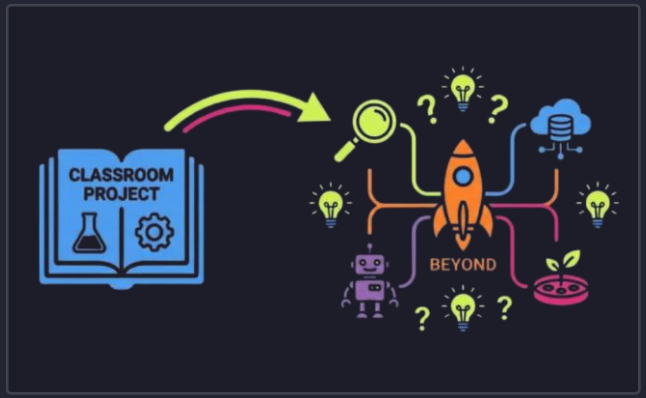
Personal Branding

- Learn how to leverage github, twitter, LinkedIn, blogs, side-projects etc to build your personal brand.

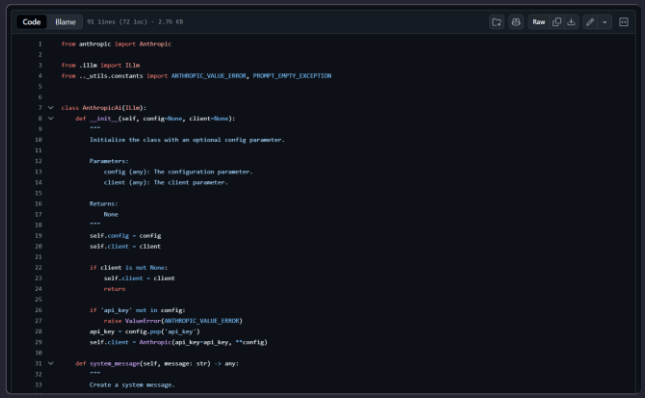
{Section 03}

How to start?

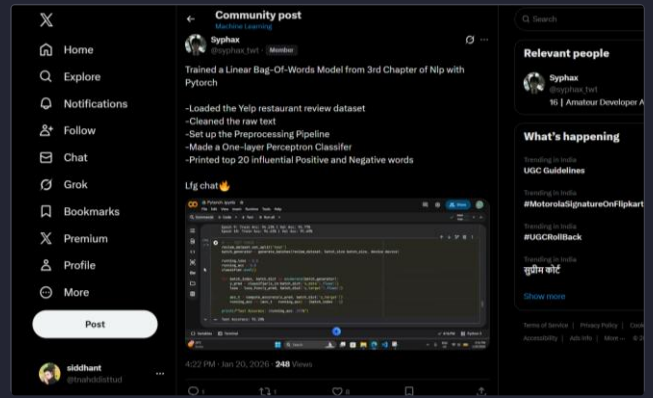
Go beyond classroom projects. Add additional features and do your tiny experiments.



Start reading other people's code on github.



Learn in public.



Codebasics INC

Day 146 of my AI Journey.

Deep Learning Specialization.

Course 2 Module 2 (Optimization Algorithms) Started.
- Mini Batch GD ✅
-Exponential Weighted Averages ✅
-RMS Prop ✅

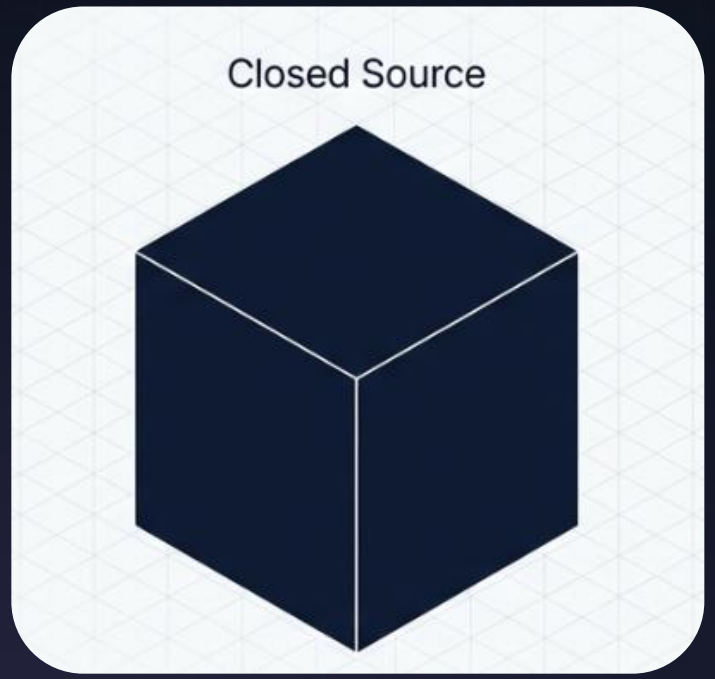
{Section 04}

Introduction to the OpenSource Ecosystem

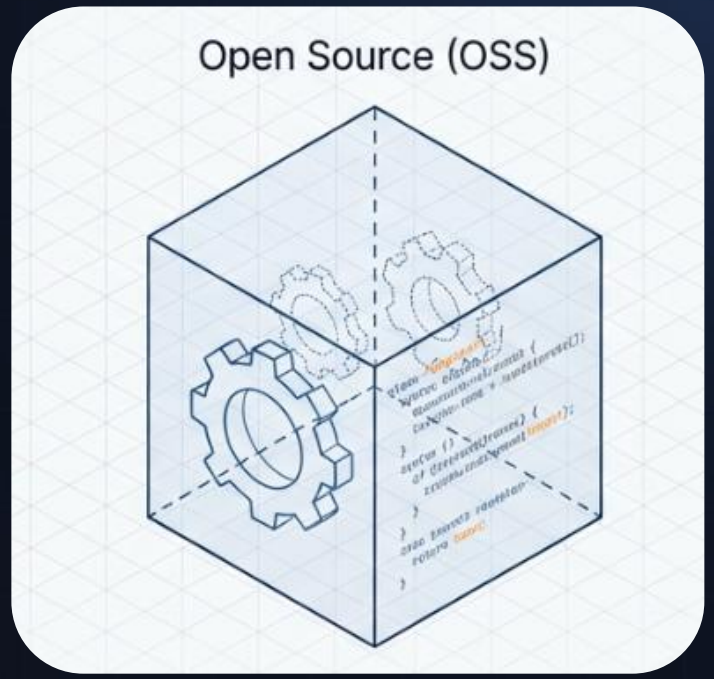
What is Opensource Software?

A ‘Black Box’.



You can use the software, but you can’t see how it works.

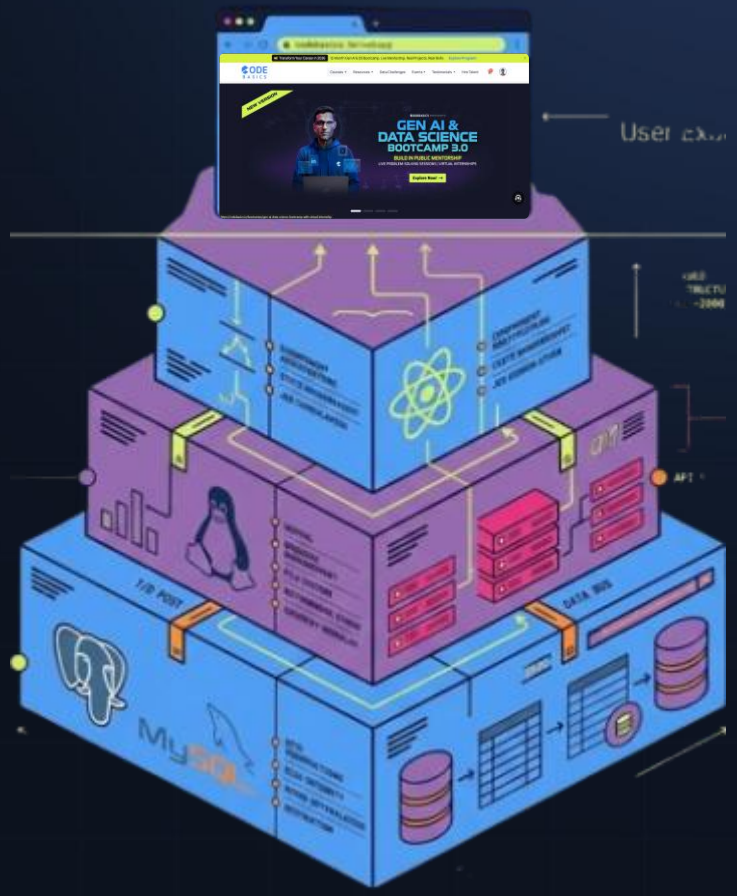
A ‘Glass Box’.



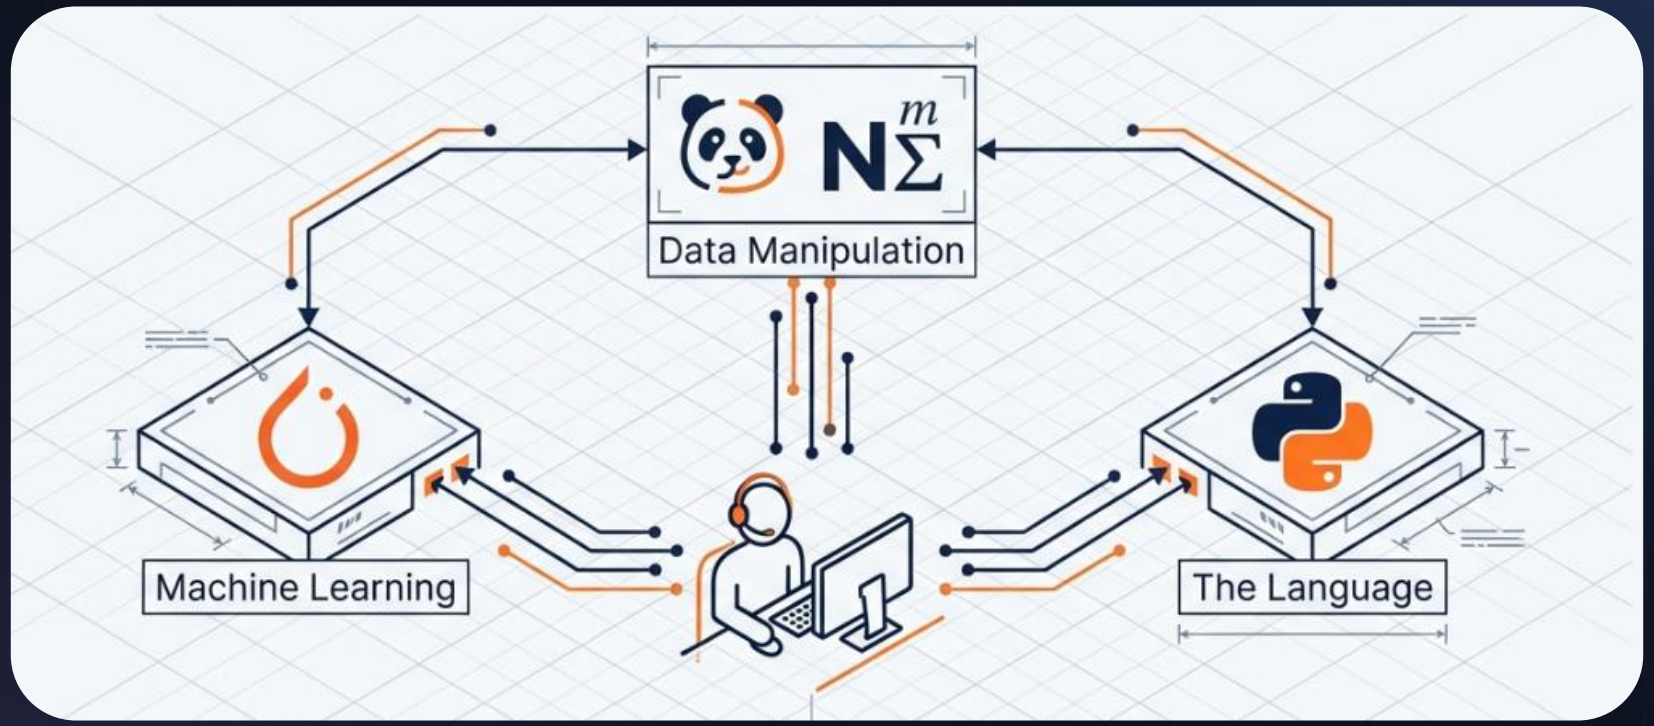
The source code is publicly available.

What is Opensource Software?

Almost every technology used commercially stands on the shoulders of opensource software.



Without Open Source, Modern Development Ceases to Exist!



It isn’t just the infrastructure. The tools you learn and use daily are open source.
You are a direct beneficiary of this ecosystem, every time you write a line of code.

The power of Community Driven Development!

Devs worldwide review the code.

Bugs are reported and fixed faster

Features evolve based on real world feedback

{Section 04}

What’s in it for you?

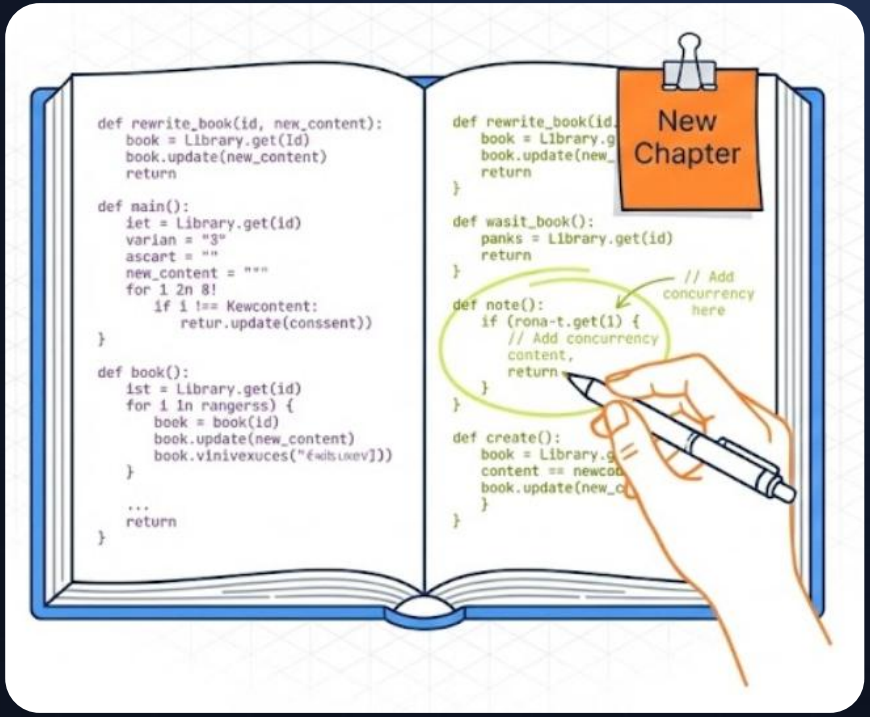
Imagine a Library, where you can

Read every book for free.

Fix the typos you find.

Expand and write new chapters

Use existing book as inspiration & start new series.



Codebasics INC

Access Real World Experience From Top 1%

You learn how teams actually collaborate globally.

Your code is reviewed by top-tier developers who maintain these huge projects.

You learn standards and best practices that you can’t learn otherwise.

You have real proof of work.

Access Real World Experience From Top 1%

You learn how teams actually collaborate globally.

Your code is reviewed by top-tier developers who maintain these huge projects.

You learn standards and best practices that you can't learn otherwise.

You have real proof of work.

I know Python

vs

I have contributed in a core python library!

GitHub: The Engine of Open Source

- Projects are hosted
- Issues are reported
- Discussions happen
- Code is reviewed
